Own a MeterFlow. Power Pricing in Your Stack.

Become a MeterFlow Enterprise Partner and build a future-ready consumption monetization engine backed by sub-millisecond listeners, real-time ledgers, and a growing enterprise network.

Partner With Us

Empowering modern enterprises to build the next generation of consumption monetization.

Consumption Monetization is Evolving

Become a MeterFlow Enterprise Partner and build a future-ready usage pricing engine backed by technology, streaming listeners, and an automated ledger network.

Growing Customer Expectations

Modern cloud & AI consumers expect pay-as-you-go, real-time consumption transparency across every compute request.

Strong Developer Demand

Software platforms continue to switch to usage-based pricing because customers value fairness, precision, and zero upfront waste.

Technology Gap

Many companies lack access to the distributed tools, stream processors, and digital infrastructure needed to meter accurately.

The MeterFlow Opportunity

MeterFlow empowers engineering teams with turnkey technology, operational support, and a high-throughput event network.

Future-Ready Business Model

Operate a monetization architecture designed for changing customer consumption habits and evolving market trends.

Community-Led Growth

Build a strong enterprise presence while benefiting from an auditable, multi-tenant automated ledger network.

Empowering modern enterprises to build the next generation of consumption monetization.

What is MeterFlow?

MeterFlow is a unified metering network that enables engineering teams to operate modern consumption-based products using a unified technology and ledger ecosystem.

Partner-Owned Architecture

Operate your own MeterFlow ingestion pipeline with complete ownership, tenant isolation, and day-to-day control.

Technology Enabled

Access high-throughput event listeners and calculation workers designed to simplify billing operations and improve efficiency.

Brand Recognition

Build your consumption pricing under an enterprise-grade metering brand with mathematical precision and long-term vision.

Network Benefits

Leverage a connected ecosystem of automated webhooks built to support partner growth, Stripe sync, and ERP expansion.

Operational Support

Receive guidance, mathematical modeling assistance, and dedicated architecture support throughout your journey.

Scalable Opportunity

Start with one meter and explore future growth opportunities as your API ingestion traffic scales to millions of events.

Your Telemetry. Our Technology. Shared Growth.

The MeterFlow Advantage

MeterFlow combines the reliability of distributed streaming listeners with the precision of modern accounting, creating a model designed for long-term partner growth.

0% Platform Fee First 100k Events

0% Platform Fee in Year One

Focus on building your product and onboarding customers from day one without recurring minimum commitments during your initial launch.

✓ Up to 100,000 monthly events free forever

99.999% Idempotency Guard

Every event is verified against unique distributed Redis hashes to completely eliminate double-billing on retries.

Real-Time Ledger. Real Trust.

Unlike opaque month-end batch jobs, MeterFlow operates an open ledger where customers view consumption live.

Omni Billing Feeds

Itemized usage data feeds automatically into Stripe, Razorpay, NetSuite, Zoho, and external ERP financial systems.

Managed Telemetry Pipeline

Stateless HTTP event queues and workers are managed by MeterFlow, allowing developers to focus on core features.

Built for Future Consumption Commerce

Designed to support evolving models including GPU compute seconds, LLM tokens, active seats, and multi-tier rate cards.

Bringing together streaming telemetry, digital metering, and local trust in a single ecosystem.

What You Get as a MeterFlow Partner

From technology and stream queues to ledger accounting and developer experience, MeterFlow provides the infrastructure needed to build and scale.

Technology Infrastructure

Access a centralized platform for telemetry ingestion, idempotency deduplication, and operational control.

Automated Dispatch Network

Outbound invoice and threshold webhooks are broadcast reliably, reducing integration burden on engineering.

Monetization & Rate Cards

Benefit from graduated pricing brackets, package volume commitments, and overage protections in Indian Rupees (₹).

Training & Guidance

Receive interactive onboarding assistance, SDK documentation, and sample apps to help launch your product effectively.

Tenant Service Framework

Leverage customer self-serve dashboards designed to streamline usage visibility, budget caps, and invoice downloads.

Network Expansion Opportunities

Become part of a growing usage-based software ecosystem with future opportunities for multi-cloud expansion and scale.

One Ecosystem. Multiple Growth Enablers.

High-Throughput Technical Architecture

Clean MVC separation, stateless asynchronous worker pools, and sub-2ms latency.

TIER 01 • EDGE

Client Ingestion

REST POST /api/v1/events, Webhooks, Python/Node/Go SDKs, streaming telemetry from apps and cloud clusters.

TIER 02 • < 2MS

Listener Gateway

Stateless rate-limiting, bearer token auth, schema validation, and distributed Redis idempotency cache deduplication.

TIER 03 • ENGINE

Metering Engine

Sliding window aggregators, SUM/COUNT/MAX rules, tier rate card evaluation, and instantaneous ledger recalculation.

TIER 04 • SETTLEMENT

Invoicing & ERP Feeds

Transactional MongoDB ledger, GST PDF invoice generator, automated webhook dispatcher to Stripe, Razorpay & NetSuite.

Pipeline Benchmark: 142,500 evt/s Ingestion Capacity 1.2ms Median Latency Zero Dropped Packets Under Load

Engineered for sub-2ms processing latency and linear horizontal scalability.

Arbitrarily Complex Consumption Math at Scale

Define any billing metric without writing custom map-reduce jobs or database triggers.

SUM (Cumulative Total)

LLM Prompt/Completion Tokens, Storage GB-Hours, Transaction Volume in ₹, or bytes transferred over CDN.

COUNT (Discrete Occurrence)

API Calls executed, Webhooks delivered, SMS notifications sent, or database queries evaluated.

MAX (Peak Utilization)

Peak concurrent seats, highest RAM allocation, peak bandwidth spike, or active channel capacity in a cycle.

UNIQUE (Distinct Cardinality)

Distinct monthly active user IDs (MAU), unique visited tenant domains, unique customer IP addresses.

WEIGHTED_DURATION

GPU cluster compute seconds multiplied by hardware class coefficient (e.g. Nvidia A100 vs H100 GPU tiers).

RATE_WINDOW (Bursts)

Price dynamic traffic bursts over rolling 60-second sliding windows to penalize abusive traffic spikes.

If your system can emit an event, MeterFlow can meter, aggregate, and price it instantly.

Sophisticated Monetization Models in INR (₹)

Empower your product team to launch and iterate on revenue models without touching backend code.

VOLUME DISCOUNT

Graduated Tier Pricing

Customers pay descending unit prices as their volume grows, incentivizing scale without price shocks.

Tier 1: ₹0.05 (1–100k) • Tier 2: ₹0.03 (100k–1M) • Tier 3: ₹0.015 (1M+)

PACKAGE COMMIT

Pre-Purchased Volume Blocks

Upfront cash collection with automatic overage buffers to prevent service interruption.

₹4,999 for 500,000 API requests • Overage at ₹0.012 per extra request

HYBRID SAAS

Platform Base Fee + Overage

Guarantees recurring baseline revenue while retaining uncapped upside from high-usage enterprise customers.

₹2,499/mo base subscription includes 50,000 events + metered delta

DRAWDOWN LEDGER

Prepaid Wallet Drawdown

Zero payment default risk with automated notifications when customer balance drops below 20%.

Customer tops up ₹50,000 wallet • Metered consumption auto-draws live

Empower your product team to launch new pricing plans in minutes without backend code deployments.

How the Partnership Works

A simple and structured onboarding process designed to help partners launch and grow their MeterFlow business with confidence.

Apply

Submit your interest and share basic technical details with our architecture team.

Evaluation

Our team reviews ingestion throughput, meter formulas, and rate card suitability.

Agreement

Finalize SLA commitments, billing currency in INR (₹), and issue bearer tokens.

Launch

Connect API endpoints, stream live events, and start auto-generating invoices.

Grow

Leverage the MeterFlow ecosystem to build and scale your usage revenue.

From application to launch, we're with you every step of the way.

Investment & Partnership Model

A transparent partnership structure designed to help enterprises enter the future of consumption pricing with lower barriers and long-term growth potential.

Partner Investment

One-time onboarding fee based on market, territory, and business potential.

₹25,000

No Setup Fee

MeterFlow does not charge any additional hidden setup fees for cloud sandbox activation.

0% Royalty**

Zero platform percentage charges during the first year of operations up to 100,000 monthly events.

Minimal Royalty Thereafter

A simple volume-based pricing structure ranging from ₹0.002 to ₹0.005 per ingested event.

Full Ownership: Partners retain complete data ownership and operational control of their metering ledger.

100% transparent pricing — zero hidden setup fees and no surprise platform charges.

Meet the Team Behind MeterFlow

Backed by experience, driven by purpose — our leadership combines product, finance, and ops to deliver seamless Partner success.

SS

Shubham Singh

Chief Executive Officer (CEO)

Tech Systems Lead

Founder of MeterFlow, driving tech-led metering innovation. With a strong grasp of operations, product, and growth, he brings startup agility and strategic vision to help brands scale faster and smarter in today's competitive API commerce landscape.

AM

Arjun Mehta

Chief Operating Officer (COO)

Ex-Streaming Architect

An operations mastermind, growth enabler, and P&L strategist. Held senior infrastructure leadership roles at distributed technology companies, delivering results through strategic execution, operational rigor, and scalable low-latency growth models.

PS

Priyanka Sharma

Chief People & Finance Officer (CFO)

Fintech Billing Strategist

Financial leader and strategist at MeterFlow, managing capital efficiency, Indian GST automated tax reconciliation, and organizational strength. With a balanced lens on numbers and compliance, she ensures every engine operates profitably.

Backed by experience, driven by purpose — our leadership combines product, finance, and ops.

Own a MeterFlow. Build the Future of Commerce.

Join a growing network of enterprises redefining consumption pricing through technology, trust, and local ownership. Whether you're looking to launch your first metered API or expand an existing venture, MeterFlow provides the ecosystem, support, and infrastructure to help you succeed.
